A Housing Dream Come True:

Mr. T came through the Main Frame Job Readiness Program in December of 2016, one of the only times we have offered a December class. Before that he completed pre-class computer training to sharpen up his technological skills. Though it took time, after graduation Mr. T eventually found employment as a maintenance technician working for a local golf course and country club. He has been at that role for nearly one year now and enjoys the work.

The problem Mr. T kept encountering was housing. He could not find an affordable, accessible apartment that met his needs. Due to this, he was stuck residing in an extended stay motel that charged exorbitant rates, thus curtailing his ability to save and build a financial cushion.

After months and months of searching, Mr. T's persistence paid off! He found an apartment that meets his needs and charges 40% less than the extended stay motel. Now he can finally afford to save and build for the future.

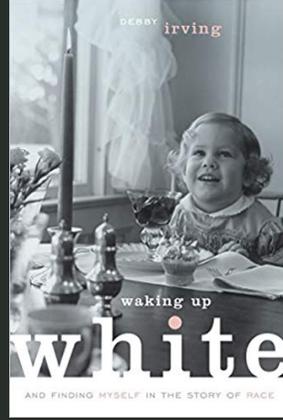

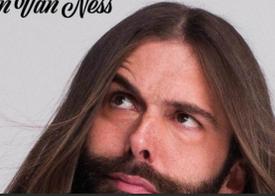

We were fortunate enough to assist Mr. T with a large cost associated with the move in. He needed to be able to pay the first month of rent and a security deposit equal to another month of rent to be able to move in. This proved to be an insurmountable barrier due to the high rent being charged at the extended stay motel. With some help from the OAC Mr. T has now been able to move in to an affordable, accessible apartment. We are so excited to see his continued progress!

In the Know:

GETTING CURIOUS

with Jonathan Van Ness

EARWOLF

Getting Curious with Jonathan Van Ness is a podcast that produces a myriad of topics all ranging from racism and misogyny to renaissance art, global politics and women in the military, focusing of course on LGBTQI rights in our country. JVN offers subject matter simply based on what he is curious about, inviting an expert to come and discuss with him. The podcast gives fresh voices to many subjects that peak our curiosity.

Waking Up White is a novel that truly captures the way White Privilege and racism has overtaken our country's psyche and embedded themselves into every facet of our lives. The author truly makes it a personal experience but one that the majority of White America can relate to. If you need an in-depth, introductory course on white privilege, this is the book for you.

**Thank You for Reading!
Happy Halloween!**
